Functional Group ID= ${\bf CP}$

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Contract Pricing Proposal Transaction Set (805) cover sheet and pricing support detail for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set enables the transmission of cost and pricing data for a given contract action and provides pricing support detail data or references where that data can be found in the proposal.

Notes:

- 1. This transaction set is used by a contractor to provide "cost or pricing data" or "information other than cost or pricing data" (hereafter referred to by the term data) requested by a contracting officer in accordance with the provisions of the Federal Acquisition Regulation 15.8
- 2. This transaction set can be used to provide data for a solicitation or for a single award instrument, e.g., a contract, a delivery order, etc.; for a modification to an award instrument; or for several modifications to an award instrument when the data does not need to be identified to a specific modification.
- 3. Supporting data that is not contained in this transaction set shall be provided in the 251 transaction set.
- 4. All numbers cited in this transaction set shall be transmitted as a continuous number without extraneous characters except where such characters are a part of the number.

Transaction Set Notes

- 1. When the N1 loop is used, it will carry the name and address of a party pertinent to the proposal, such as the proposing party, the place(s) of performance, the contract administration, and auditing offices.
- When CB101 is code "01," "05," "08," "10," "11," "12," "14" or "17," discussion will carried in the MSG segment in the CB1 loop; numbers and their text descriptions will be carried in the N9 segment of the CB1 loop.
- 3. When the N1 loop is used, it will carry the name and address of a party needed to clarify a response to a question answered in the CB1 loop, such as party for whom the same or a similar item as the one being proposed, has been previously produced.
- **4.** PD03 is the unit of measurement for the data contained in the PD loop.

- 5. When the N1 loop is used, it will carry the name and address of a party related to the proposal data such as a major subcontractor whose cost or price information has been rolled up into this price proposal.
- **6.** When the AMT segment is used, it can carry amounts such as the proposed cost, total proposed fee, total proposed profit, total cost of money, total proposed price or alternate proposed price.

Segment: ST Transaction Set Header

Position: 010

Loop:

Level: Heading Usage: Mandatory

Max Use:

Purpose: To indicate the start of a transaction set and to assign a control number

Syntax Notes:

Semantic Notes: 1 The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810

selects the Invoice Transaction Set).

Comments:

BCP Beginning Segment for Contract Pricing Proposal **Segment:**

Position:

Loop:

Level: Heading Usage: Mandatory

Max Use:

Purpose: To indicate the beginning of a Contract Pricing Proposal Transaction Set and transmit

identifying numbers and dates

Syntax Notes:

Semantic Notes: 1 BCP04 is the start of the proposer's fiscal year.

> 2 BCP07 is the transaction creation date.

> 3 BCP08 is the transaction creation time.

4 BCP10 is the revision number of the proposal.

5 BCP11 is the option number being proposed.

BCP12 is the description of an "other" type of contract action.

BCP13 is the description of an "other" type of contract

Segment: REF Reference Numbers

Position: 035

Loop:

Level: Heading Usage: Optional Max Use: 20

Purpose: To specify identifying numbers.

Syntax Notes: Semantic Notes:

1 At least one of REF02 or REF03 is required.

Comments: Notes:

REF03

352

Description

1. Use to identify reference numbers applicable to the entire transaction set.

2. At least one REF segment is REQUIRED with code EL cited in REF01.

2. At least one REF segment is REQUIRED with code EL cued in REF 01.								
			Data Eleme	ent Summary				
Must Use	Ref. <u>Des.</u> REF01	Data Element 128	Name Reference Number Code qualifying the C4	Qualifier	Attributes M ID 2/2			
				 Use to indicate an award instrumenumber other than a modification number of the property of the p	umber cited in by to this 805			
			DO	Delivery Order Number When BCP02 is code CT, use, if applindicate a call, release or delivery ordesic award instrument. This is alway Supplemental Procurement Instrument Number (SPIIN) for DoD or the equiverpression for Civilian Agencies.	der against the ays the ent Identification			
			PR	Price Quote Number Use to indicate the number assigned				
			TN	proposal submitted in an 843 transac Transaction Reference Number	tion set.			
				Use to indicate the unique reference related transaction set (e.g. a 251 transaction set). Each transaction guide the carrying supporting data). Each transaction the case of the 2set, that number is carried in BGN02 cite the transaction set number, e.g., positions of REF03.	nsaction set nsaction set has a 51 transaction 2. When used,			
			WF	Locally Assigned Control Number				
				Use to indicate the working modifical assigned to a draft 860 transaction se				
	REF02	127	Reference Number		X AN 1/30			

When REF01 is code TN, use to identify the transaction set number.

Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.

A free-form description to clarify the related data elements and their content

AN 1/80

Segment: MSG Message Text

Position: 040

Loop:

Level: Heading Usage: Optional Max Use: >1

Purpose: To provide a free form format that would allow the transmission of text information.

Syntax Notes: Semantic Notes:

Comments: 1 MSG02 is not related to the specific characteristics of a printer, but identifies top of

page, advance a line, etc.

Notes: Use to provide information that cannot be provided elsewhere in this transaction set.

Segment: N1 Name

Position: 060
Loop: N1
Level: Heading
Usage: Optional

Max Use:

Purpose: To identify a party by type of organization, name, and code

Syntax Notes: 1 At least one of N102 or N103 is required.

2 If either N103 or N104 is present, then the other is required.

Semantic Notes: Comments:

1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

N105 and N106 further define the type of entity in N101.

Notes:

- 1. Whenever possible, identification and address information should be provided using N101, N103, and N104. Use N102 and segments N2 through N4, as applicable, when the address cannot be provided using one of the codes listed in N103.
- 2. When BCP01 is code 00, 07, or 15, and the cost or price proposal is submitted by a prime contractor, multiple iterations of this N1 loop are REQUIRED with N101 citing, at a minimum, codes SE, C4, and KF. Codes 28 and 61 must also be used if applicable.
- 3. When BCP01 is code 00, 07, or 15, and the cost or price proposal is submitted by a subcontractor, there must be multiple iterations of the N1 loop with N101 citing, at a minimum, codes 28, C4, KF and SE. Code 61 must also be used if applicable.
- 4. When BCP01 is code 01, there must be 2 iterations of the N1 loop citing either code SE or 28 in N101 in one iteration and either code BY or C4 in a second iteration.

			1. LIN02 through LIN31 are used in pairs, e.g., LIN02 contains a qualifier code and LIN03 contains data related to the code.				
			2. Any code can be used, but the same codes used in the corresponding 843 transaction set should be used. The listed codes are preferred.				
			3. When identifying components of an assembly, the assembly must be identified by use of code F8.				
			4. Any code identified in this data element may be used in an 235 data element.	y following			
			AK Refined Product Code CG Commodity Grouping				
			Use to indicate a commodity code.				
			CH Country of Origin Code				
			CL Color				
			CN Commodity Name				
			EF Exhibit Identifier				

Use to indicate the letter assigned to an exhibit.

F7 End-Item Description

Use to indicate the end item to which the ordered item applies.

F8 Next Higher Used Assembly

Use to indicate the assembly to which the identified components apply.

FS National Stock Number

The NSN shall be transmitted without dashes.

FT Federal Supply Classification

IN Buyer's Item Number

Use to indicate a locally assigned code for a product or service whenever stock number does not apply.

KF Item Type Number

LT Lot Number

MF Manufacturer

When used, cite the DUNS number of the manufacturer in the following data element.

MG Manufacturer's Part Number

When used, a second 235/234 pair must be used citing either code MF or ZB.

- MN Model Number
- N1 National Drug Code in 4-4-2 Format
- N2 National Drug Code in 5-3-2 Format
- N3 National Drug Code in 5-4-1 Format
- N4 National Drug Code in 5-4-2- Format
- ND National Drug Code (NDC)
- PD Part Number Description

Use to indicate a clear text description of an item that cannot be identified by a number, e.g., transportation.

PN Company Part Number

PU Part Reference Number

Use to indicate a part number assigned by an industry (not related to a specific manufacturer). Do not use for National Drug Codes.

RC Returnable Container No.

Use to indicate an NSN, manufacturer's part number, or other identifying number (except a serial number) of a returnable container.

SN Serial Number

Use to indicate the serial number of the item cited in JIL02. For example, the serial number of an aircraft engine that is to be repaired.

SV Service Rendered

Use to indicate (in text) the service being ordered.

SW Stock Number

Use to indicate a local stock number.

SZ Vendor Alphanumeric Size Code (NRMA)

Use to indicate the size of an item being ordered.

UK U.P.C./EAN Shipping Container Code (1-2-5-5-1)

Segment: CB1 Contract and Cost Accounting Standards Data

Position: 160
Loop: CB1
Level: Heading
Usage: Optional

Max Use: 1

Purpose: To specify contract and cost accounting standards data

Syntax Notes: Semantic Notes: Comments:

Notes: 1. There must be at least 8 iterations of this CB1 loop.

2. Use of this loop is REQUIRED when BCP01 is code 00, 07, or 15.

Data Element Summary

Ref. Data

Des. Element Name

Must Use CB101 1309 Acquisition Data Code

Attributes

M ID 2/2

Code identifying acquisition data

- 1. When BCP01 is code 00, 07, or 15, one of the codes from each of the following 8 groups of codes must be present in 8 separate iterations of this segment: (code 01 or 02), (code 03 or 04), (code 05 or 06), (code 07 or 08), (code 09 or 10), (code 11, 12, or 13), (code 14 or 15), (code 16 or 17).
- 2. When CB101 is code 01, use the 1/MSG/170 and 1/N9/180 segments to identify the required property and to provide the contract number under which the property in the contractor's possession is accountable.
- 3. When CB101 is code 03, CB102 is REQUIRED. If none of the codes available in CB102 identify the type of financing, use the 1/MSG/170 segment to identify the type of financing.
- 4. When CB101 is code 05, use the 1/MSG/170 and 1/N9/180 segments, and the 1/N1/190 loop to provide information applicable to the contract and items that were previously awarded.
- 5. When CB101 is code 08, 10, 14, or 17, use the 1/MSG/170 segment to provide an explanation.
- 6. When CB101 is either code 11 or 12, use the 1/N1/190 loop to identify the office to which the disclosure statement was submitted.

O1 Government Property Required

If awarded the contract, the proposer will require the government to furnish some property in order to

perform the contract

When used, the 1/MSG/170 segment may be used to identify the amount the contractor proposes to pay for

the use of government furnished property.

O2 Government Property Not Required

If awarded the contract, the proposer will not require the government to furnish property in order to perform

the contract

03 Contract Financing Required

If awarded the contract, the proposer will require contract financing, such as advance or progress payments, or a guaranteed loan in order to perform the

04	Contract Financing Not Required
04	Contract Financing Not Required
	If awarded the contract, the proposer will not require
0.7	contract financing to perform the contract

	with disclosed practices or standards
17	Proposal Not Consistent With Disclosed Practices or
	Standards

Certification indicating that the proposal is not consistent with disclosed practices or standards

CB102 1310 Financing Type Code O ID 1/1

Code identifying the type of contract financing required by the submitter of a pricing proposal

- 1. When CB101 is code 03, this data element is REQUIRED.
- 2. If none of the listed codes adequately describe the required type of financing, use the 1/MSG/170 segment to identify the type of financing.
 - A Advance Payment
 A payment made in advance of work performed
 - G Guaranteed Loan
 A commercial loan guaranteed by the proposal
 - A commercial loan guaranteed by the proposal requesting entity or some higher authority
 - P Progress Payment

A payment for progress made under a contract

Use to indicate customary progress payments as

defined in FAR 32.501-1.

Segment: MSG Message Text

Position: 170
Loop: CB1
Level: Heading
Usage: Optional
Max Use: >1

Purpose: To provide a free form format that would allow the transmission of text information.

Syntax Notes: Semantic Notes:

Notes:

Comments: 1 MSG02 is not related to the specific characteristics of a printer, but identifies top of

page, advance a line, etc.

1. Use to provide information related to the codes specified in CB101. Use of this segment is encouraged when CB101 is code 01, 03, 05, 08, 10, 12, 14, or 17.

2. When CB101 is code 01, this segment may be used to identify the amount the contractor is proposing to pay for the use of government furnished property.

Segment: N9 Reference Number

Position: 180
Loop: CB1
Level: Heading
Usage: Optional
Max Use: >1

Purpose: To transmit identifying numbers and descriptive information as specified by the

reference number qualifier

Syntax Notes: 1 At least one of N902 or N903 is required.

2 If N906 is present, then N905 is required.

Semantic Notes: Comments:

Notes:

1 N906 reflects the time zone which the time reflects.

When CB101 is code 01 or 05, use to provide reference numbers applicable to the required government furnished property or contract/items furnished under a contract for the same or similar items as contained in this proposal.

Data Element Summary

Code qualifying the Reference Number.

Ref. Data

Des. Element Name

Must Use N901 128 Reference Number Qualifier

M ID 2/2

1. When CB101 is code 01, code CT shall be used to identify the contract and contract line item number (CLIN) under which the required property is presently held. Codes CH, MF, NS, PM, QY, S6, VR, W2, or W7 may be used to describe the property.

2. When CB101 is code 05, codes C7 and CT shall be used to identify the contract and contract line item number (CLIN) under which the same or similar item was awarded. The CLIN of the item in the proposal shall be identified in N903. Codes CH, MF, NS, PM, QY, S6, VR, W2, or W7 need only be used if a similar item was previously awarded. These codes shall not be used if the item that was previously awarded was the same as the item proposed.

C7 Contract Line Item Number

- 1. Use when CB101 is code 05.
- 2. When CB101 is code 05, code C7 shall be used to indicate the contract line item number (CLIN) of the same or similar item that was awarded. Identify the CLIN of the proposed item in N903.

CH Customer catalog number

Use when CB101 is code 01 or 05.

CT Contract Number

- 1. Use when CB101 is code 01 or 05.
- 2. When CB101 is code 01, code CT shall be used to indicate the contract under which the required property is presently held accountable.
- 3. When CB101 is code 05, code CT shall be used to indicate the contract under which the same or similar item was awarded.

	act Pricing Propo	osai		
			MF	Manufacturers Part Number
				1. Use when CB101 is code 01 or 05
				2 W
				2. When used, another N9 segment must be transmitted with either code VR or W7 cited in N901.
			NS	National Stock Number
			110	Use when CB101 is code 01 or 05.
			PM	Part Number
			L IAI	Use when CB101 is code 01 or 05.
			OV	Service Performed Code
			QY	
				Number indicating the type of service performed to repair a product
				Use when CB101 is code 05. When used, cite a code
				from appendix A in N902 and, if necessary, provide a
				short text description in N903.
			S6	Stock Number
				Use when CB101 is code 01.
			VR	Vendor ID Number
				Use to indicate a DUNS or DUNS plus 4 number. Use only when a previous iteration of this N9 segment
				cited code MF.
			W2	Weapon System Number
				Identifies a weapon system
				Use when CB101 is code 01.
			W7	Commercial and Government Entity (CAGE) Code
				Code that identifies a commercial contractor authorized
				to do business with the U.S. Government
				Use to indicate a CAGE code. Use only when a
				previous iteration of this N9 segment cited code MF.

N1 Name **Segment:**

Position: N1 Loop: Level: Heading **Usage:** Optional

Max Use:

Purpose: To identify a party by type of organization, name, and code

At least one of N102 or N103 is required. **Syntax Notes:**

If either N103 or N104 is present, then the other is required.

Semantic Notes:

Comments:

- 1 This segment, used alone, provides the most efficient method of poviding organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
- N105 and N106 further define the type of entity in N101.

Notes:

- 1. When CB101 is code 01, 05, 11, or 12, use to identify the party holding the required government furnished property if other than the proposing party, the customer for whom the same or similar work was performed or the party that received a disclosure statement.
- 2. Whenever possible, identification and address information should be provided using N101, N103, and N104. Use N102 and segments N2 through N4, as applicable, when the address cannot be provided using one of the codes listed in N103.

PL Proposal Cost Logic **Segment:**

Position:

Loop:

Level: Detail Usage: **Optional** Max Use:

Purpose:

To describe the cost logic used when pricing a particular aspect of a proposal

Syntax Notes: Semantic Notes:

- PL01 is the logic sequence number.
- PL03 is the name of the cost element being proposed.
- 3 PL05 is a text description of the cost element contained in PL03.
- PL06 is an occurrence counter that indicates the order of items to appear in a cost summary data display.

Comments:

Notes:

- 1. This segment is REQUIRED in original, duplicate or revised transaction sets, e.g., when BCP01 is code 00, 07 or 15.
- 2. The PL Segment should be used in a "bottom-up" approach, (e.g., if total direct labor dollars is composed of engineering labor dollars plus manufacturing labor dollars, then the calculation formula for these must be presented in the transaction set before the calculation for the direct labor dollars).

EXAMPLE:

PL*1*DO*DEL*E*DIRECT ENGINEERING LABOR*2 N/L PL*2*HR*DELH*M*DIRECT ENGINEERING LABOR HOURS N/L PL*3*A8*ELR*F*ENGINEERING LABOR RATE N/L PL*4*DO*DML*E*DIRECT MANUFACTURING LABOR*3 N/L PL*5*HR*DMLH*M*DIRECT MANUFACTURING LABOR HOURS N/L PL*6*A8*MLR*F*MANUFACTURING LABOR RATE N/L PL*7*DO*TDL*E*TOTAL DIRECT LABOR*1 N/L PL*8*DO*TDEL*A N/L PL*9*DO*TDML*F N/L

- 3. If the proposed labor rates are at a lower level, e.g., by engineering labor category or by department, then the PL Segments must start at that lower level to conform to the "bottom-up" convention.
- 4. If the formula provided in this segment is for a total, the PD/PDD segments shall be used to provide the total.
- 5. Use of the number "1" in PL06 of the first iteration of the PL Segment in the example above, indicates its order on the summary table; i.e., it would be displayed first.

M Multiply

R Raise to a Power

S Subtract

PL05 352 Description

O AN 1/80

A free-form description to clarify the related data elements and their content

The "long-hand" description for the "short-hand" name carried in PL03, (e.g., if the proposing party carries "DLH" in PL03, then PL05 will carry Direct Labor Hours in free form text. This now identifies that "DLH" equals Direct Labor Hours in the proposing party's accounting system. The description is only required when the "NAME" data element (PL03) is first used within the flow of segments within the transaction set. After that, the value may be referred to by its "short-hand" name only.

PL06 609 Count O N0 1/9

Occurence counter

When PL02 is code DO and PL04 is code E, use to identify where dollar amounts are to be displayed on the summary table, e.g., if the number 7 was cited, that would indicate that the dollars for the specified category appear as the 7th item on the summary table.

Segment: HL Hierarchical Level

Position: 020 Loop: HL Level: Detail Usage: Optional

Max Use:

Purpose: To identify dependencies among and the content of hierarchically related groups of data

segments

Syntax Notes: Semantic Notes: Comments:

1 The HL segment defines a top-down/left-right ordered structure.

- 2 HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.
- 3 HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.
- 4 HL03 indicates the context of the seres of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.
- 5 HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

Notes:

- 1. Use this segment to provide the hierarchical (tree) structure of the proposal, e.g., contract, line item, WBS, etc.
- 2. This segment is REQUIRED when BCP01 is code 00, 07, or 15.

			This data element is typically used when PD03 is code I	00 or	HR.	
			26 Recurring			
			Costs that will incurr continually over	er the	life c	of the
			The state of the s			

contract

Use to indicate the values in the following PDD

segment are recurring.

Nonrecurring

Costs that will only be incurred once

Use to indicate the values in the following PDD

segment are non recurring.

ZZ Mutually Defined

Use to indicate the values in the following PDD segment are both recurring and non recurring.

Must Use PD08 127 Reference Number

O AN 1/30

Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.

Use is REQUIRED to provide a number that will uniquely identify each PD segment. Start with the number one (1) and increase progressively with

segment. Start with the number one (1) and increase progressively with each PD segment. The purpose of this number is to differentiate between cost elements identified in PD05, specifically when the same cost element is specified for different purposes, e.g., Engineering Labor for CLIN 0001 and Engineering Labor for CLIN 0002.

PD09 352 Description

O AN 1/80

A free-form description to clarify the related data elements and their content

Use to identify whether or not Cost of Money (COM) applies to the cost element provided in this loop. Cite the letter N if the element is not a COM factor; cite the letter Y if the element is a COM factor. Also, provide a free form text description of the data being provided, e.g., labor rates, overhead rates, direct input, etc.

PD10 1401 Proposal Data Detail Identifier Code

O ID 1/3

Code identifying the basis of a cited value in a proposal

Use to identify the nature of the proposal values.

AM Actual
AN Estimated
AO Negotiated

Includes rates established by Forward Pricing Rate

Agreements.

AP Mixed

Segment: SPI Specification Identifier

Position: 045
Loop: PD
Level: Detail
Usage: Optional

Max Use:

Purpose: To provide a description of the included specification or technical data items

Syntax Notes: Semantic Notes: Comments: 1 If either SPI02 or SPI03 is present, then the other is required.

Notes:

Use to identify the government security classification and/or the commercial protection level assigned to the data transmitted in the same PD loop. If the data has neither a government security classification nor a commercial protection level, this segment need not be used.

Segment: PDD Pricing Data Detail

Position: 060
Loop: PD
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To provide the rates, direct input, and pricing factors for each element of work, cross-

referenced to an applicable request or submission

Syntax Notes: 1 At least one of PDD02 PDD03 or PDD04 is required.
 Semantic Notes: 1 PDD01 is a sequential number assigned by the initiator.

Comments:

Notes: 1. This segment is REQUIRED when BCP01 is code 00, 07, or 15.

2. ONLY ONE of PDD02, PDD03, or PDD04 is permitted in each iteration of this PDD segment.

3. The number of iterations of this PDD segment within each PD loop must be equal to the number carried in PD04 for each iteration of the PD loop.

N1 Name **Segment:**

Position: N1 Loop: Level: Detail Usage: Optional

Max Use:

Purpose: To identify a party by type of organization, name, and code

At least one of N102 or N103 is required. **Syntax Notes:**

If either N103 or N104 is present, then the other is required.

Semantic Notes:

Comments:

- This segment, used alone, provides the most efficient method of providing 1 organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
- N105 and N106 further define the type of entity in N101.

Notes:

- 1. Whenever possible, identification and address information should be provided using N101, N103, and N104. Use N102 and segments N2 through N4, as applicable, when the address cannot be provided using one of the codes listed in N103.
- 2. Use this N1 loop only to provide address and reference number data when the proposal contains discreet values, (e.g., subcontract costs, inter-divisional transfers,
- 3. When either code 28 or DV is used, another iteration of this loop is REQUIRED citing code C4 in N101.
